SUMMARY

Frontend-focused developer with 8.5+ years of experience in application support, maintenance, and backend technologies, currently transitioning into modern web development using JavaScript and React.js.

Skilled in building responsive web applications, API integration, and problem-solving with strong expertise in SQL and production systems.

Actively developing real-world projects and strengthening Data Structures & Algorithms to deliver scalable and efficient frontend solutions.

EXPERIENCE

Freelance Frontend Developer

Self-Employed

October 2023 - Present

- Developing frontend solutions with a focus on React.js and modern JavaScript.
- Building responsive web applications using component-based architecture.
- Implementing dynamic UI rendering, state management, and API integration.
- Developing real-world applications such as dashboards and tracking systems.
- Applying Data Structures & Algorithms to solve complex programming challenges.
- Utilizing Git/GitHub for version control and collaborative project management.

Technical Lead

LTIMindtree

August 2022 - October 2023

- Provided L2/L3 production support for enterprise insurance applications in a high-availability environment.
- Managed incident resolution (P1–P5), ensuring SLA adherence using ServiceNow and JIRA.
- Collaborated with development teams for defect analysis and enhancements.
- Performed SQL query optimization and data validation for issue resolution.
- Conducted root cause analysis (RCA) to improve system stability and reduce recurring issues.
- Coordinated with cross-functional teams for release management and deployments.

Associate / Programmer Analyst / Trainee

Cognizant

March 2015 - August 2022

- Delivered L2/L3 application support and maintenance across multiple enterprise systems.
- Led migration of legacy .NET applications to modern frameworks, improving performance and maintainability.
- Developed and maintained APIs and backend services using .NET and SQL Server.
- Resolved bugs, implemented enhancements, and managed production deployments in an Agile environment.
- Utilized ServiceNow for incident tracking and resolution within SLA timelines.
- Leveraged frontend technologies including HTML, CSS, JavaScript, and AngularJS to enhance user interfaces.

EDUCATION

B.Tech in Information Technology

West Bengal University of Technology • 2010 – 2014

CERTIFICATIONS

LeetCode SQL 50 Badge

SKILLS

Languages: JavaScript, C#, SQL, HTML, CSS

Frameworks: React.js, .NET, ASP.NET API

Databases: SQL Server, PostgreSQL

Tools: Git, GitHub, JIRA, ServiceNow

Concepts: REST APIs, OOP, Data Structures & Algorithms
